

Electrical and Electronics Engineer

Company: Binford Research Labs Pvt Ltd

Location: Hyderabad

Experience : 5years

Employment Type: Full-Time(11AM-8PM)

***Prior experience in the defense or aerospace industry is advantageous.**

About Us:

Binford Research labs pvt ltd is a 5 year old startup that predominantly focuses on the Design, Development, Assembly, Manufacturing and deployment of Unmanned Autonomous systems for India and its armed forces. Binford comprises veterans from the Armed forces , DRDO , Industry and Academia . Binford is a winner of IDEX for the development of a Hand Held Hard Kill CUAS system for the Indian Air Force.

Job Description:

We are seeking an experienced Electrical and Electronics Engineer with a minimum of 2 years of relevant experience to join our dynamic drone and robotics company. As a key member of our team, you will contribute to the development and enhancement of cutting-edge drones for aerospace and defense industry clients.

Key Responsibilities:

- Lead the design and development of electrical systems for drones, including power distribution, wiring, and circuitry optimization.
- Choose appropriate electronic components, sensors, and microcontrollers, ensuring they meet performance and reliability requirements.
- Design and program embedded systems for drone control and automation, optimizing for efficiency and reliability.
- Conduct comprehensive testing, simulations, and validation of electrical and electronic systems to ensure robust functionality and compliance with industry standards.
- Ensure electrical and electronic systems adhere to aerospace and defense

regulations, safety standards, and certifications.

- Diagnose and resolve complex technical issues related to electrical and electronic systems, providing innovative solutions.
- Maintain detailed documentation of electrical and electronic designs, test results, and compliance documentation.
- Collaborate effectively with cross-functional teams, including mechanical engineers, autonomy engineers, and software developers, to ensure seamless integration of systems.

Education:

Bachelor's degree in Electrical and Electronics Engineering

Skills & Experience:

- Proficiency in electrical system design and circuitry optimization.
- Strong knowledge of electronic component selection and microcontroller programming.
- Experience with embedded systems programming (C/C++).
- Familiarity with sensor integration and data acquisition.
- Expertise in electrical and electronic systems testing, validation, and troubleshooting.
- Understanding of aerospace and defense industry regulations.
- Excellent problem-solving and critical-thinking abilities.
- Effective communication and teamwork skills.
- Commitment to safety, innovation, and high-quality standards.
