

Title: Hardware Prototyping Intern

Location: Hyderabad, Telangana (iTIC – IIT Hyderabad, DLabs – ISB)

Duration: 6 months

About Us: At KLVIN Technology Labs, we are at the forefront of integrating cutting-edge technologies to create innovative solutions for industrial safety and efficiency. Our commitment to excellence drives us to seek talented individuals who share our vision of a safer, smarter industrial world.

Role Summary: We are looking for a self-motivated and technically skilled Hardware Prototyping Intern to play a pivotal role in developing and refining our IoT hardware prototypes. This position is ideal for someone who thrives in an independent work environment and is passionate about bringing hardware concepts to life.

Key Responsibilities:

1. Independently manage the design, development, and testing of hardware prototypes for IoT devices.
2. Utilize skills in PCB design and electronic circuit fabrication to create and iterate prototype designs.
3. Perform rigorous testing of prototypes to ensure reliability and functionality.
4. Collaborate with cross-functional teams to integrate hardware with software platforms.
5. Provide innovative solutions to hardware challenges and contribute ideas for product improvement.
6. Document the prototyping process, including design choices, testing procedures, and iteration cycles.

Required Skills and Qualifications:

1. Currently enrolled in or a recent graduate of a program in Electrical Engineering, Electronics, Mechatronics, or a related field.
2. Strong hands-on experience in PCB design and electronic circuitry.
3. Demonstrated ability to work independently with minimal supervision.
4. Proficient in the use of electronic testing equipment and tools.
5. Solid understanding of IoT technologies and principles.
6. Excellent problem-solving skills and attention to detail.

Preferred Skills:

1. Prior experience in hardware prototyping, especially in IoT or similar fields.
2. Knowledge of 3D modeling and CAD software for designing enclosures.
3. Experience with wireless communication technologies.

Benefits:

- Opportunity to work on cutting-edge technology in IoT and industrial safety.
- Exposure to a dynamic startup environment.
- Mentorship from experienced professionals in the field.

How to Apply: Interested candidates should submit their resume along with a portfolio showcasing relevant projects or prototypes to hiring@klvin.ai . Please include a cover letter highlighting your experience in hardware development and your approach to independent work.
