

Job Title: AI Engineer Internship

Overview:

Our company is seeking a highly motivated and talented AI Engineer Intern to join our team. This internship opportunity is designed for individuals who are passionate about artificial intelligence and want to gain practical experience in this field.

As an AI Engineer Intern, you will be responsible for developing and implementing AI algorithms and models. You will work closely with our team of experts to develop AI applications for various projects. You will also be responsible for maintaining and enhancing the performance of the AI models.

Responsibilities:

- Develop and implement AI algorithms and models
- Collaborate with our team of experts to design and develop AI applications for various projects
- Optimize and fine-tune AI models to ensure optimal performance
- Analyze large and complex datasets to derive insights and develop predictive models
- Participate in code reviews and provide feedback to other team members
- Document and report on the progress of the AI models and applications
- Stay up-to-date with the latest developments and advancements in the field of AI

Requirements:

- Strong understanding of AI principles, machine learning, and data science
- Experience with programming languages such as Python, R, and C++
- Familiarity with deep learning frameworks such as TensorFlow, Keras, and PyTorch
- Experience with data analysis and visualization tools such as Pandas, Numpy, and Matplotlib
- Excellent problem-solving skills and attention to detail
- Ability to work independently and as part of a team
- Strong written and verbal communication skills

Education:

Pursuing or completed a degree in Computer Science, Mathematics, Engineering or related field

Working days : Monday - Saturday

Work Timing: 11:00 AM - 8:00 PM

This is a paid internship position. The internship is expected to last for 3 months. The position may lead to a full-time job offer for candidates who demonstrate exceptional performance during the internship period.
