

Job Title: Electronics Engineer Internship

Job Overview:

As an Electronics Engineer Intern, you will be responsible for supporting the design and development of electronic products, systems, and components. You will work under the guidance of experienced engineers to gain practical experience in various aspects of electronics engineering, including circuit design, prototyping, testing, and troubleshooting. You will be exposed to a wide range of projects, from concept development to product launch, and will have the opportunity to contribute to the success of the team.

Key Responsibilities:

- Support the design and development of electronic products and systems
- Participate in prototyping, testing, and troubleshooting of electronic components and systems
- Collaborate with cross-functional teams to ensure the successful launch of electronic products
- Research and evaluate new technologies and components for integration into electronic products and systems
- Create and maintain accurate documentation of electronic designs and testing results
- Support quality assurance and regulatory compliance efforts related to electronic products

Qualifications:

- Pursuing a Bachelor's or Master's degree in Electronics Engineering or a related field
- Strong understanding of electronic design principles and concepts
- Familiarity with electronics design software such as Altium or Eagle
- Experience with circuit design, prototyping, and testing
- Strong analytical and problem-solving skills
- Excellent communication and teamwork skills
- Familiarity with quality assurance and regulatory compliance in electronics design is a plus

Working days : Monday - Saturday

Work Timing: 11:00 AM - 8:00 PM

This is a paid internship position. The internship is expected to last for 3 months. The position may lead to a full-time job offer for candidates who demonstrate exceptional performance during the internship period.
