

Job Title: Mechanical Design Engineer Internship

Job Summary:

Our company is seeking a motivated Mechanical Design Engineer Intern to join our team. As a Mechanical Design Engineer Intern, you will work closely with experienced professionals to develop and design mechanical components and systems for various projects. You will also assist in analyzing and testing designs and prototypes.

Responsibilities:

- Collaborate with senior engineers to design and develop mechanical components and systems using computer-aided design (CAD) software
- Conduct research to assist in the design process and provide recommendations for materials, manufacturing methods, and engineering techniques
- Analyze and test designs to ensure compliance with engineering principles, customer requirements, and safety standards
- Create and modify technical drawings and schematics using CAD software
- Assist in the preparation of reports, documentation, and presentations for project meetings
- Participate in project meetings and provide updates on progress, challenges, and recommendations
- Work collaboratively with cross-functional teams to ensure the successful completion of projects
- Adhere to company policies and procedures, including quality control, safety standards, and project timelines
- Perform other duties as assigned

Requirements:

- Currently pursuing a Bachelor's or Master's degree in Mechanical Engineering or related field
- Strong knowledge of mechanical design principles and CAD software
- Proficient in Microsoft Office suite (Word, Excel, PowerPoint)
- Excellent communication and interpersonal skills
- Ability to work independently and in a team environment
- Strong problem-solving and analytical skills
- Attention to detail and accuracy

Working days : Monday - Saturday

Work Timing: 11:00 AM - 8:00 PM

This is a paid internship position. The internship is expected to last for 3 months. The position may lead to a full-time job offer for candidates who demonstrate exceptional performance during the internship period.
