About iTIC Incubator

iTIC is a premier Technology Business Incubator (TBI) based in India, operating under the aegis of the Indian Institute of Technology Hyderabad (IITH) and supported by the Department of Science and Technology (DST), Government of India. As a Not-For-Profit Society, iTIC is dedicated to creating a supportive and nourishing environment for budding entrepreneurs in the field of technology.

The primary focus area of iTIC is deep tech, which refers to technology that is built on a scientific or engineering foundation and has a substantial impact on society. However, iTIC's expertise is not limited to any specific sector and extends to a diverse range of areas such as healthcare, energy, and sustainability, among others.

iTIC offers a comprehensive range of programs and services to support startups at every stage of their entrepreneurial journey. These include pre-incubation, incubation, advanced incubation, and acceleration programs that engage with startups from the ideation stage until the growth stage.

About iTIC Incubator

We help entrepreneurs leverage a premier quality research and startup ecosystem to build a comprehensive platform to practice innovation and entrepreneurship. iTIC incubator provides various opportunities, resources, and learning experiences so that these entrepreneurial ideas can be turned into sustainable, scalable profit-making business ventures.

How We Do

We dispense stagewise intervention for startups to grow in the deeptech entrepreneurial ecosystem. iTIC provides support to startups such as Mentoring, Financial Aid, IP Support, Networking, Office/Co-working space, Software tools, IITH Technological Infrastructure, and Prototyping. iTIC team's regular follow-up and assessment techniques help the stakeholders by enhancing their understanding and the effectiveness of a program, activities, costs, and other benefits.

Startup Journey with iTIC

Germination: For idea stage student-prenuers, iTIC has structured a 12 month program that would help students convert their idea into prototype.

Pre-incubation:

For PoC stage entrepreneurs, iTIC has a structured pre-incubation program of 12 months. This program aims to support entrepreneurs convert their PoC to working prototypes.

Incubation:

For the startups that have a prototype, iTIC has a structured incubation program of 24 months. This program aims to support startups, convert their prototypes into sellable products and gain traction.

Advanced Incubation:

For the startups that have completed their incubation journey and are MVP ready, iTIC has a 12 month advanced incubation program. This program aims to support startups that wants to achieve Product Market fit.

Acceleration:

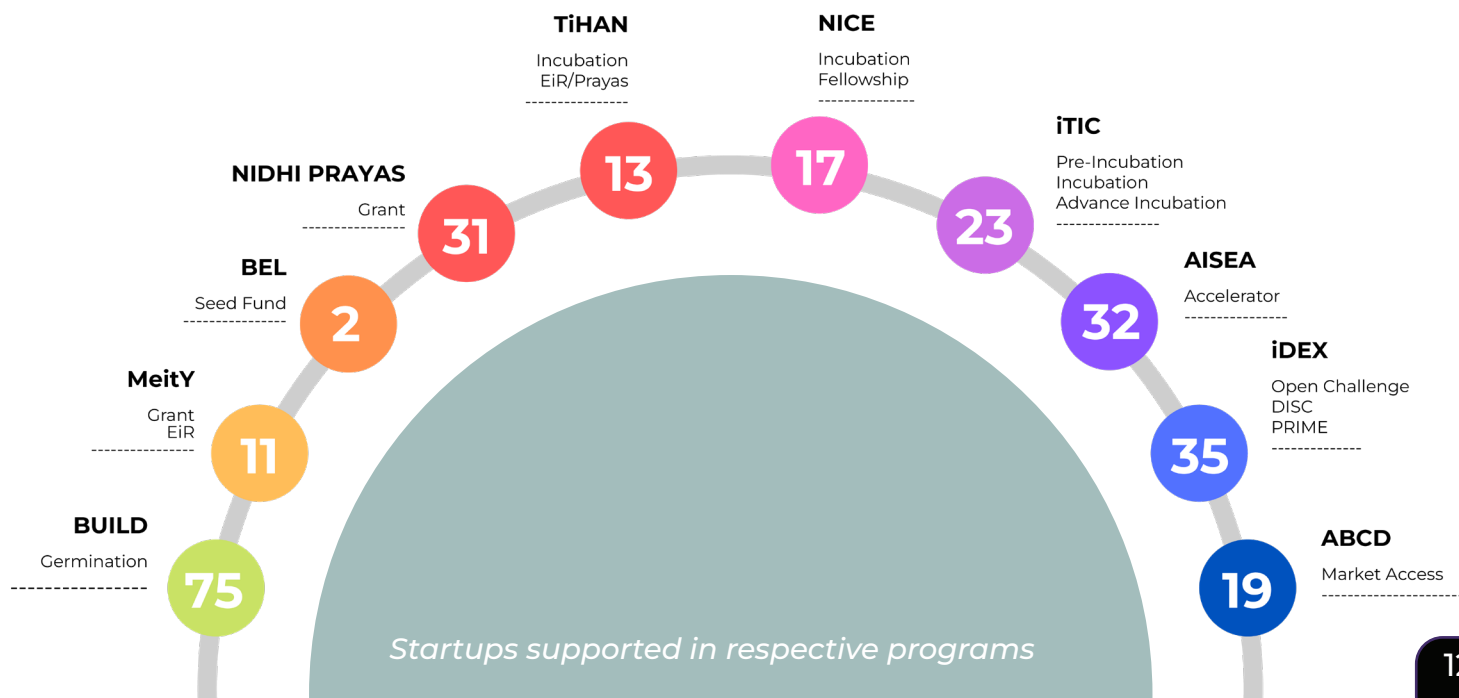

When a startup has early traction in the market and wants to grow exponentially, iTIC supports startups via cohort-based 4-6 months accelerator programs.

Programs at iTIC

Under the umbrella of iTIC, various grants and programs support entrepreneurs in sector specific/ agnostic areas, like

- **NICE** for sector agnostic deep tech innovations
- **TiHAN** for autonomous navigation and UAVs
- **iDEX DIO** for defence applications
- **MeitY TIDE 2.0** for IT product related innovations
- **NIDHI PRAYAS** for hardware based ideas
- **BUILD** for Idea-stage student preneur
- **BEL** for video analytics applications
- **AISEA** for social impact based tech innovation

Program Structure

The programs are categorized into five parts depending on the stage of the startup.

Germination	BUILD
Pre-incubation	iTIC Pre-incubation, NICE Fellowship, TiHAN PRAYAS/EiR, NIDHi PRAYAS, MeitY EiR and Grant, BEL Seed Fund
Incubation	iTIC Incubation, NICE Incubation, TiHAN Incubation
Advanced Incubation	iTIC Advanced Incubation
Acceleration	AISEA

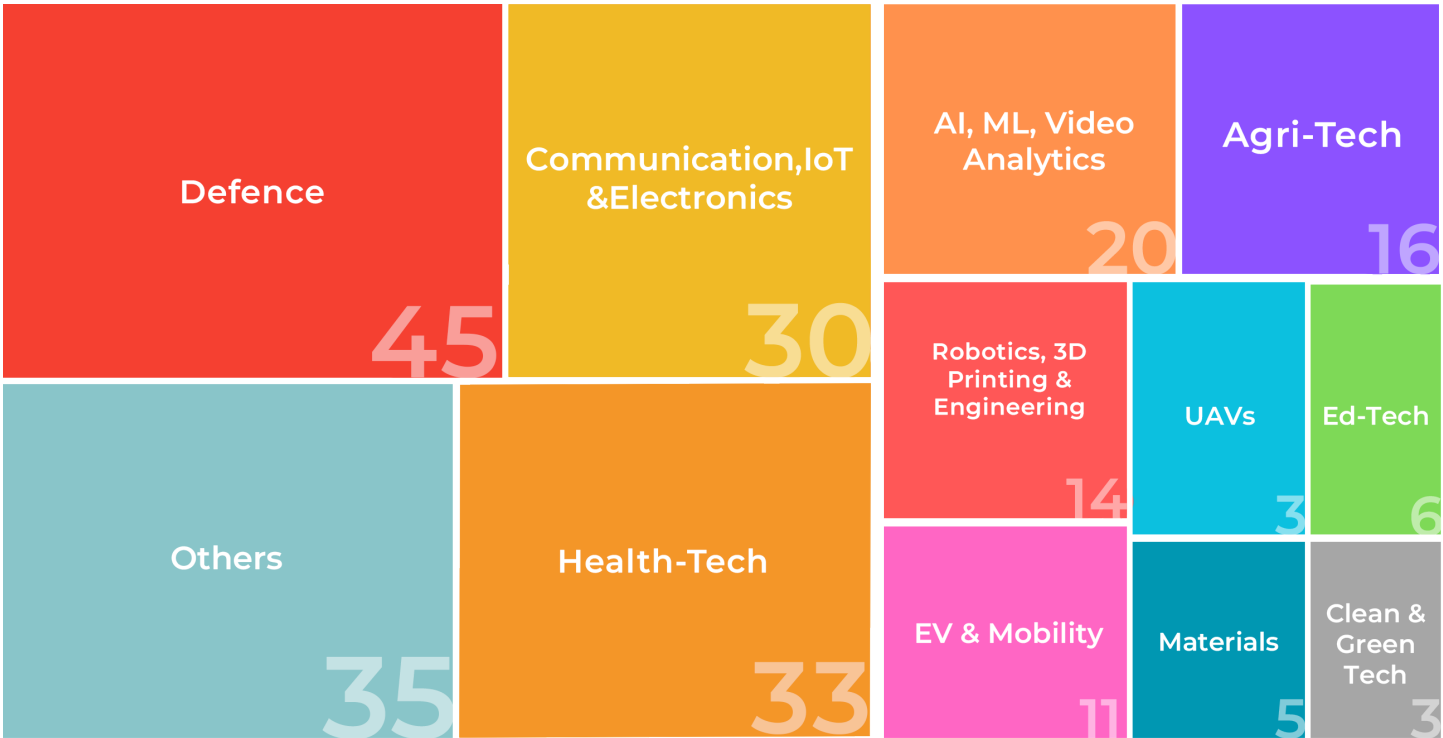

iTIC is a partner incubator for iDEX program and supports startups at prototype stage to build the products specifically for defence and aerospace applications.

Host	iDEX
------	------

Startup Sectors

ITIC being a sector agnostic incubator, have supported startups from more than 30 domains. Below is the bifurcation of sectors and the number of startups supported in each domain.

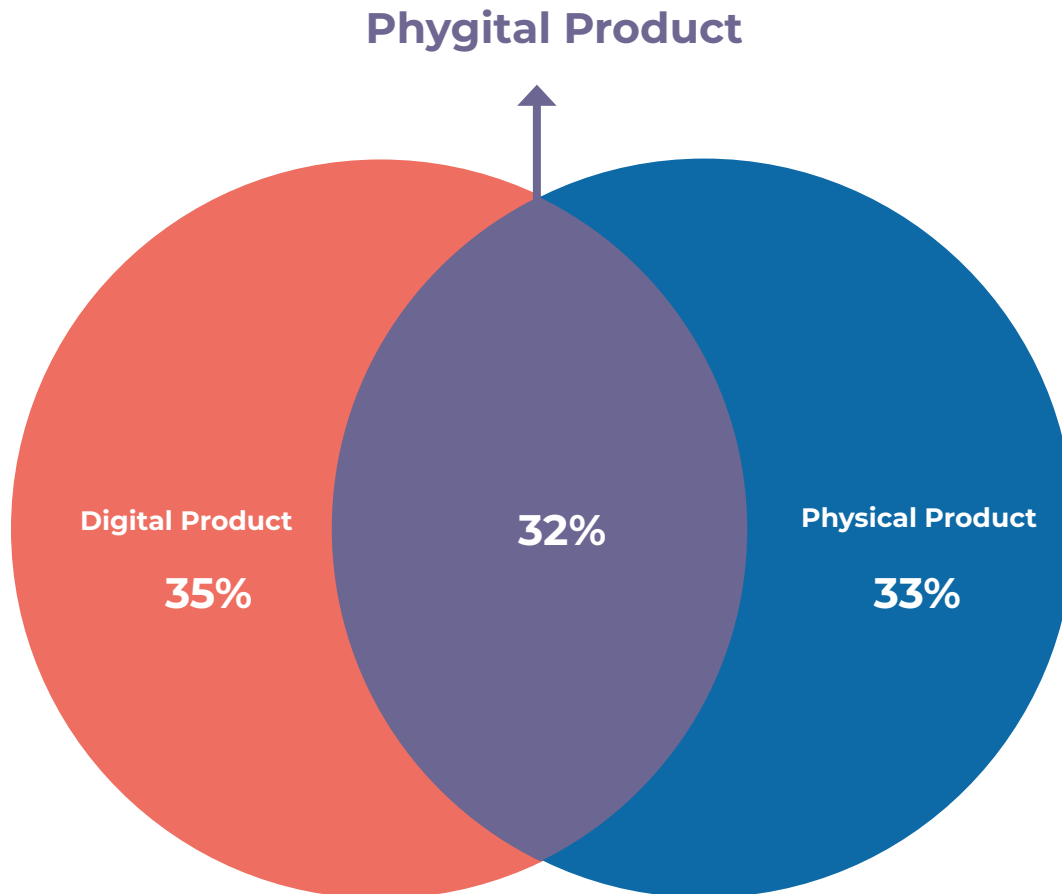

Type Of Business

Startups can be bifurcated into 3 categories depending on the way they serve their customers: Physical product, Digital product and Phygital (Physical & Digital combined) product.

Physical Product: When a need is solved by innovating in a hardware based product

Digital Product: When a need is solved by innovating in a software based product

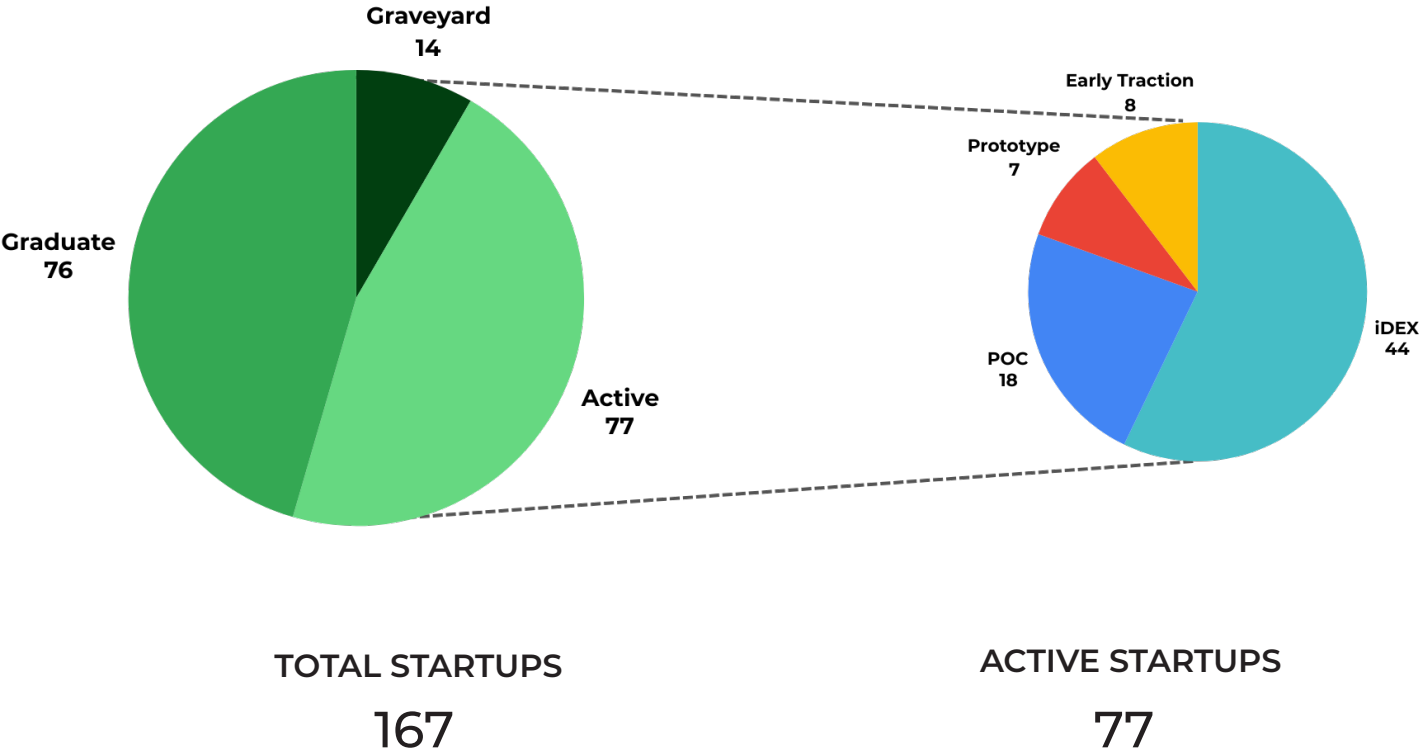

Phygital Product: When a need is solved by innovating in both hardware & software based product.

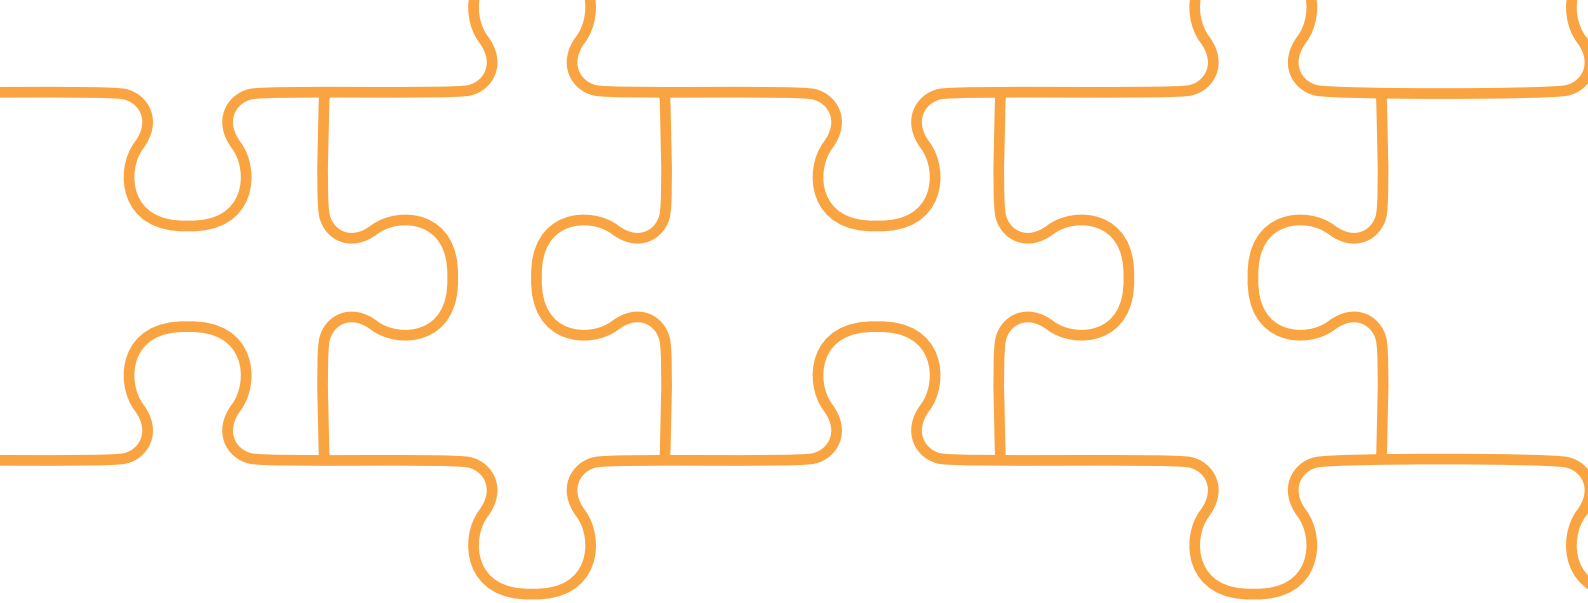

Stage of Startups

A stage of startup determines the type of support they require during their journey. iTIC emphasizes on identifying the right stage of any startup to serve them better. Below is the bifurcation on various startups at different stages.

ITIC STARTUP PORTFOLIO

Theta Additive Pvt. Ltd.

Establishment Date: December 2023

Brand Name: Theta Additive

Type of Business: Product-based

About the Business

Theta Additive is developing extra-corporeal membrane oxygenation (ECMO) devices, which along with heart lung machines, are globally utilized for cardiopulmonary bypass management, during open heart surgeries, to convert venous blood into oxygenated blood.

Founders

Amit Kumar Shukla | Managing Director | 5+ years | M.Tech
| IIT Hyderabad

Team Members

1 Managing Director | 1 Chief Scientific Officer |
1 Chief Medical Officer

Problem Statement

Imported oxygenators, essential for open-heart surgeries, are produced by only a few foreign companies, making them very costly (over ₹21,000) and inaccessible to many patients. During pandemics and wars, the shortage of oxygenators puts patients at significant risk. Additionally, these imported oxygenators are non-recyclable, contributing to environmental pollution.

Product/Services

Made in India affordable extracorporeal membrane oxygenators (ECMO)

Key Highlights

Have filed 2 provisional patents in India also have received bronze medal from MSME.

Value Proposition

- Reduce the cost of open-heart surgeries in India, making them more accessible to patients.
- Reduce the shortage of oxygenators during pandemics and wars, improving patient safety.
- Reduce the environmental impact of oxygenators by making them recyclable.

Target Market

Hospitals, Clinics and Pharma companies. Have plans to expand sales to international markets, such as Asia, Africa and Latin America.

Program

Nidhi Prayas

Sector

Healthcare, Medical Devices

Caneman

Cane Man

Establishment Date: August 2021

Brand Name: Cane Man

Type of Business: Product-based

About the Business

To develop low cost and farmer friendly harvester for sugarcane.

Founders

Naga Munesh Babu Bolem | CEO | 12 years | NTTF & IIIE

Problem Statement

Non availability of labour and low cost harvester for sugarcane harvesting.

Value Proposition

Labour for harvesting one acre of sugarcane is INR 25000, which can be harvested by using this machine in INR 10000. There are no competitors with respect to this concept in India.

Target Market

Sugarcane farmers and sugarcane factories.

Team Members

1 Founder

Product/Services

Sugarcane harvester which can be operated by farmer which comes with low cost.

Key Highlights

NA

Program

Nidhi Prayas

Sector

Agri Tech

Establishment Date: September 2022

Brand Name: E-Prognosis

Type of Business: Product-based

About the Business

Building a system for EV vehicle to monitor motors and eventually making EV safe and reliable.

Founders

K Avinash Reddy | Founder | 5 years | B-Tech | IIT Roorkee

Team Members

1 founder | 2 intern

Problem Statement

EV motors experience high RPMs, leading to accelerated wear and vibrations. Right now, there is no affordable solution to monitor the health condition of EV motors, despite being the 3rd most critical component in EV vehicles.

Product/Services

Smart IOT based module to monitor EV motor.

Value Proposition

Constant health monitoring of EV vehicle motors through data analysis of critical motor parameters using AI/ML, IOT and Applied Physics.

Key Highlights

Single axis prototype validated.

Target Market

EV startups and companies

Program

Nidhi Prayas

Sector

IOT, EV

About the Business

Pavakah is revolutionizing clean energy with nano-colloidal photovoltaic paint, turning any surface into a solar panel for widespread, low-carbon electricity generation.

Founders

Vikram Bakaraju | Co-founder | CEO | 7 years | M.Sc NanoTech & Condensed Physics
Kapardhi Bharadwaj | Co-founder | COO | MBA | 10 years

Problem Statement

The carbon intensity of solar photovoltaic panels remains a concern due to insufficient recycling technology and knowledge, posing a significant gap in achieving a circular economy. With an estimated 70 GW of panels being decommissioned annually starting from 2026, waste management emerges as a pressing issue.

Value Proposition

Integrating Nanomaterials and Artificial Intelligence to optimize renewable energy utilization, focusing on circular economy, universal solar access, and deployment simplicity.

Target Market

Large-scale establishments like indoor stadiums, warehouses, factories, and residential housing societies.

Team Members

2 Co-founders

Product/Services

A nano colloidal paint that converts any surface into solar panel using nanotechnology and optoelectronics.

Key Highlights

Received pre-seed investment from Wilbe Capital Fund LLP and Aar EM Ventures LLP.

Bloom

Establishment Date: January 2015

Brand Name: Bloom

Type of Business: Product-based

About the Business

Bloom is creating a spatial computing device emphasizing advanced hardware, featuring a novel operating system and processor. Tailored for defense use, it also serves industrial design and education, introducing a new era of computing.

Founders

Subhajeet Mukherjee | Founder | Foothill College US | Product | Community and Engineering

Problem Statement

The lack of specialized hardware and a dedicated operating system designed to meet the unique needs of India's expanding market. Existing AR solutions fail to address the specific demands of India's diverse market, limiting their widespread adoption.

Value Proposition

Bloom is developing its own processor and operating system, distinct from prevailing market solutions, dedicated to combating threats to privacy and national security.

Target Market

Defence Personnel, Government, Primary and Secondary Schools.

Team Members

1 Founder | 1 Engineer

Product/Services

A spatial computer, with advanced hardware and software, and a small physical footprint, serves in defense, education, and manufacturing.

Key Highlights

Program

Nidhi Prayas

Sector

Mixed Reality

CleanTech Robotics

Establishment Date: May 2023

Brand Name: CleanTech Robotics

Type of Business: Product-based

About the Business

The startup leads the way in innovative sewer maintenance, using state-of-the-art robotics for effective and non-destructive pipe cleaning. Committed to prioritizing worker safety and environmental sustainability, it strives to transform the industry through advanced solutions that lower expenses and improve infrastructure upkeep.

Founders

Rohit Singh | Founder | CEO | Industrial Automation

Problem Statement

The sewer maintenance industry faces inefficiencies, hazards, and human dignity concerns with manual cleaning methods. There's a pressing need for an innovative solution ensuring safer, more efficient, and respectful practices in sewer maintenance.

Value Proposition

Cleantech solution is unique for its ability to perform thorough maintenance without causing structural damage. This innovative approach enhances worker safety, cuts costs, and maintains environmental integrity. Setting them apart from traditional methods, it provides unmatched efficiency and sustainability in sewer maintenance.

Target Market

Municipalities, utility companies, sewer maintenance contractors, industrial facilities, solutions, sewer pipe cleaning, maintenance.

Team Members

1 Founder

Product/Services

Sewer pipe cleaning robots designed for efficient, damage-free maintenance, enhancing worker safety, reducing costs, and ensuring environmental sustainability.

eAkrishya Innovations Pvt. Ltd.

Establishment Date: June 2022

Brand Name: Urban Mine

Type of Business: Product-based

About the Business

eAkrishya Innovations aims to establish an ecosystem for electronic assets to undergo their entire lifecycle. The asset tracking solution, based on Blockchain technology, monitors the second phase of an asset's lifecycle until it is collected or reaches its end-of-life.

Founders

Maresh KC | Co-founder | CEO | 20 years

Pushpa | Co-founder | COO | 10 years

Problem Statement

India ranks as the third-largest generator of eWaste globally. The current hydrometallurgical process for metal extraction faces several challenges. It's economically unfeasible due to high recovery costs, and the centralized process encounters logistical hurdles. Moreover, it's not environmentally friendly.

Value Proposition

The initiative emphasizes eco-friendly practices, focusing on managing waste at its source. It aims to generate rural employment and foster entrepreneurship. Additionally, it aims to contribute positively to several Sustainable Development Goals (SDGs).

Target Market

Original Equipment Manufacturers (OEMs), Original Design Manufacturers (ODMs), E-Waste Recyclers, and Electronics Consumers.

Team Members

2 Co-founders

Product/Services

BioRefinery - with bioleaching technology.

Key Highlights

Into Blue Ocean market where competition is minimal or non-existent.

Brela Innovations Pvt. Ltd.

Establishment Date: July 2023

Brand Name: Brela

Type of Business: Product-based, Service-based

About the Business

Brela Innovations concentrates on introducing ergonomic solutions to women's healthcare and medicine, particularly in the creation of a breast care device for use at home.

Founders

Shreya M. Nair | Co-founder | CEO | Biodesign, IITK-KGMU
Mohammad Zahid Khan | Co-founder | CTO | Biodesign, IITK-KGMU

Problem Statement

Breast abnormalities frequently go undetected, especially among rural women, primarily due to limited awareness and the discomfort associated with current detection techniques. These methods are expensive, painful, and rely heavily on the availability of healthcare professionals.

Value Proposition

NaiBra offers an inexpensive, convenient option for early breast issue diagnosis at home. It helps lessen the embarrassment and societal stigma related to breast health while making essential data accessible to all concerned parties.

Target Market

Women, Hospitals, Government

Team Members

2 Co-founders

Product/Services

NaiBra uses safe AI assisted technology to help pre-screen women's breasts at home itself.

Key Highlights

NA

Program

Nidhi Prayas

Sector

AI/ML, Medical Devices

Establishment Date: May 2021

Brand Name: Canorx Motors

Type of Business: Product-based

About the Business

The startup advocates for the use of sustainable, clean renewable energy electric tractors in agriculture and commercial activities. This shift aims to improve efficiency and reduce environmental impact.

Founders

Ramu Banothu | Co-founder | Managing Director | 20 Years Oracle | B.Tech CSE

Kalavathi Ramu Banothu | Co-founder | Managing Director | 12 Years | B.Tech ECE

Problem Statement

Indian agricultural farmers currently use fossil fuel-powered IC engine tractors for their farming needs. However, these conventional tractors come with high operational and maintenance costs, resulting in significant carbon emissions (2.6 kgs per litre of diesel) and limited driver comfort and safety. Due to concerns about smoke and noise pollution, there has been a reluctance to adopt technological upgrades.

Value Proposition

The Tractor offers unparalleled efficiency and versatility with zero emissions, featuring a dual recharge facility for enhanced convenience. It is powered by solar energy, ensuring sustainability while meeting diverse operational needs.

Target Market

Agricultural farmers, Municipalities, Panchayats, Construction material transportation, and luggage transportation needs in various commercial settings such as Airports, Railway Stations, Shipyards, and Markets.

Team Members

2 Co-founders | 3 Developers | 2 Managers | 2 Service Team | 1 Accounting | 1 Admin | 2 Advisories

Product/Services

Canorx multi purpose solar power electric tractor as a transformative solution to the long-standing challenges of conventional agriculture.

Manali Swing Adventures Pvt. Ltd.

Establishment Date: April 2021

Brand Name: Manali Swing

Type of Business: Service-based

About the Business

For all the Nature Lovers, extreme adventures seekers & travellers, who are dissatisfied with limited, uninteresting, & unsafe adventure options, Manali Swing offers one of the world's most creative & safe Giant Swing with 100+ Jump styles allowing one to experience the adrenaline of 70m free fall with safety backed by AI, promising impeccable safety like never before.

Founders

Utsav Soni, CEO + Salesmen | 5 years of leadership experience at TFF Foundation

Akash Vishwakarma, Operation Head | 5 years experience as Supervisor & Incharge in Educational Institute

Siddharth Prasad, AI Incharge | 5 Years of product development experience in MNC

Team Members

3 Co-founder | 3 Interns

Product/Services

Manaliswing offers the world's first Giant Swing backed by AI with 100+ Jump styles and one of the first in world to pioneer creative Extreme Adventure tourism backed by Artificial intelligence.

Problem Statement

Despite 178% increase in demand of adventure activity in last 3 years, Somewhere India has failed to cultivate the culture of innovation in extreme adventure tourism. It's Incredible India but not innovative India in terms of adventure tourism compared to its global potential resulting huge amount of travelers trusting foreign destinations for the unique adventure activities.

Value Proposition

AI can track participants and jump masters performance across millions of data points and deliver optimized approvals for jumping.

Target Market

Adventure seekers & travellers, who are dissatisfied with limited, uninteresting, & unsafe adventure options.

Key Highlights

Brand Name: Avisa Automotive

Type of Business: Product-based

About the Business

Avisa is committed to fostering opportunities for street vendors through the production of sustainable utility vehicles tailored to their needs. The mission is to empower vendors with eco-friendly and efficient solutions, fostering business growth while promoting environmental sustainability.

Founders

Paresh Mistry | Founder | CEO | Product Designer

Team Members

1 Founder | 1 Intern

Problem Statement

In India, more than 10 million street vendors operate diverse businesses, enduring long working hours for minimal wages. Challenges such as insufficient space and high shop rentals impede their income potential and hinder business expansion, underscoring the necessity for support to foster their success.

Product/Services

Electric Utility Scooter which is a versatile mobile shop with a modular design and ample storage, catering to diverse needs.

Key Highlights

Won JNTU - Hyderabad Organized Pitching Competition

Value Proposition

Electric Utility Scooter, adaptable for various businesses, boosts profits with city-wide mobility, user-friendly design, and ample storage, offering seamless operations for vendors.

Program

TIHAN EiR/Prayas

Target Market

Street Vendors from TIER 1 and TIER 2 Location

Sector

Mobility

PlebC Innovations Pvt. Ltd.

Establishment Date: December 2021

Brand Name: PlebC

Type of Business: Product-based

About the Business

Tele-Operated Robotic Ultrasound System, technology that allows medical professionals to remotely operate ultrasound machines and perform examinations on patients remotely.

Founders

Dr Venkata Krishna Prasad | Founder | Clinician & operations | MBBS | PGDM | IIM Ahemdabad

Dhanish Ahamed | Co-Founder | Robotics & Electronics Engineer

Vivek Gorrepati | Co-Founder | Product Designer

Team Members

3 Co-founders | 2 Interns

Product/Services

A safe and secure tele-operated robotic ultrasound system

Problem Statement

80-90% of diagnoses need imaging, yet 2 in 3 globally lack access. In India, 68.84% of population in rural areas with limited access to radiologists, leading to missed early diagnoses and long distance travel. Conventional ultrasound requires radiologist presence, further limiting access to this vital service.

Key Highlights

Indian provisional patent filed, grants of more than 20 lakhs

Value Proposition

Eliminating the need for radiologist presence on-site, low learning curve, and affordable

Program

TIHAN EiR/Prayas

Sector

MedTech, Robotics

Target Market

Towns with population < 60,000 | Diagnostic Center | Government PHC's | Hospital Chains

Establishment Date: December 2020

Brand Name: MediG

Type of Business: Product-based

About the Business

MediG inventions is one of the early startups in India developing advanced and early care for the cardiac arrest medical condition with smart integration of technology to increase the survival rate.

Founders

Dr Nellore Vijay Kumar | Co-Founder
Siva Prasad Enugula | Co-Founder

Problem Statement

Cardiac Arrest is an emergency and from the decades it has been treated with manual Cardiopulmonary resuscitation (CPR) which lacks in providing accurate parameters for surviving.

Value Proposition

Provide continuous HQCPR compression across various stages of the chain of survival of AHA guidelines | Affordable | Compress till the patient is taken to nearest medical aid facility | Usable in different types of transport conditions | Can be used for various body types, age groups, and gender | Can be operable in all weather conditions

Target Market

Emergency Departments Coronary & Intensive Care Units | Cardiac Catheterization Labs | Organ Transplant Facilities | In-Hospital Cardiac Arrest | EMT Rescue Units | Ambulances

Team Members

2 Founders | 1 Developer

Product/Services

Smartly operated CPR device for sudden cardiac arrest medical conditions.

Key Highlights

Indian provisional patent filed, grants of more than 20 lakhs

LiqSure Systems Pvt. Ltd.

Establishment Date: March 2022

Brand Name: HydroChem

Type of Business: Product & Service-based

About the Business

LiqSure has developed a system for the treatment of industrial wastewater. This system can treat any kind of industrial effluent at an affordable cost. It is energy efficient and cost effective in terms of Capex & Opex as compared to existing technologies in the same area.

Founders

Dr. Sarjerao Bapu Doltade | Founder & Director |
PhD Chemical Engineering

Archana Sadanand Thaware | Director | MD Paediatrics

Problem Statement

Currently industrial wastewater is a major issue to the environment causing health issues due to their hazardous nature. More than 90% industrial water is not being treated as per pollution control board discharge norms due to non efficient and affordable technologies.

Value Proposition

This developed system requires only electricity to pump the water. It doesn't require any filter or chemicals. This can be retrofitted in a 10 sq ft area and hence these makes it a unique solution for the water treatment.

Target Market

Industrial Wastewater | Swimming Pools | Sewage Treatment Plants | Smart Cities

Team Members

2 Founders

Product/Services

LiqSure has developed innovative product for wastewater treatment. It can be purchased or rented as per the industrial requirements.

Key Highlights

Generated a revenue of 80 Lakhs+ till date. Grants of INR 50+ lakhs received, Early trials in various industries

Program

NICE Fellowship, NICE Incubation

Sector

Water Treatment

Establishment Date: October 2020

Brand Name: Resonate Learning

Type of Business: Product & Platform-based

About the Business

Learn and Empower Pvt. Ltd is creating “Resonate Learning” - India’s first games + Augmented Reality based teaching-learning & assessment platform that helps the deaf & hard of hearing kids to practice & understand concepts 4-6 times faster & enables the educators to use it as a teaching & assessment tool.

Founders

Amanpreet Chopra | Co-Founder | CEO

Prabodh Mahajan | Co-Founder | COO

Problem Statement

World is home to 34M deaf children and India has 2M+ under age 15 with an almost 99% dropout rate. Most deaf children drop out only before high school as they are unable to understand what’s being taught, due to a lack of accessible learning material. The educators face challenges to create such materials and provide interventions to help each child individually due to a lack of tools.

Value Proposition

World’s first AR + game-based teaching-learning platform that is reimagining the way children with hearing impairment learn by having game-based accessible content and use of Machine Learning to help educators identify the learning needs of each individual child.

Target Market

Parents of children with hearing impairment from class K-5
| Special schools for the deaf NGOs working with children with hearing impairment

Team Members

2 Co-Founders | 1 Developer | 1 Designer | 2 interns

Product/Services

“Resonate Learning” - India’s first games + AR based teaching-learning assessment platform for special education

Key Highlights

Generated a revenue of INR 14 Lakhs till date. Conducted pilots with 5 special schools, 400+ current users, Winners of various awards

Program

NICE Incubation

Sector

AR, Ed Tech

Establishment Date: June 2021

Brand Name: Mila Fedder

Type of Business: Product & Service based

About the Business

Milatronics is a company extensively focused on solving the problems of aqua farmers by introducing an automatic feeder and pond automation devices. It aims to create an ecosystem where the traditional practices are made effective with the support of technological advances.

Founders

VSN Lokesh | CEO & Founder | 2 years | B.Tech,
V Ratna Kumari | Co-Founder | 10 Years | B.Sc

Team Members

2 Co-Founders | 2 Developers | 1 Managers | 4 Interns| 1 sales team

Problem Statement

Massive losses (around 50% of the capital) faced by aqua farmers due to irregularities in feeding prawns and mineral application for the ponds.

Value Proposition

The automatic prawn feeder focuses on assisting the aqua farmers by:
Providing a greater crop yield as compared to the previous methods
Comes within the affordable range and is user friendly
Helps in reducing the overall expenditure
Eco friendly product promoting SDG-14 goals.

Product/Services

Automatic prawn feeder innovated using IoT technology

Key Highlights

Generated a revenue of INR 8 Lakhs till date. MeitY grant of 7 lakhs, 3M Young innovator national award, Winner in IIT Madras start-up competition

Program

Target Market

Aquaculture farmers

Sector

IoT, Aquaculture

Qoptars Pvt. Ltd.

Establishment Date: August 2020

Brand Name: Qoptars

Type of Business: Product-based

About the Business

Qoptars is an AI based drone startup that makes payload swappable drones for Aerial videography, Mapping & Surveillance.

Founders

Manash Pratim Kakati | CEO

Pritam Basumatary | CTO

Shekhar Suman Kalita | COO

Problem Statement

Drones have fixed payload, that limits the capability of the Drone. Drones are not smart enough to avoid crash & fly without GPS. In India, It is not legal to buy & fly foreign manufactured & imported drone

Value Proposition

Onedrone is a platform drone where you can swap it's camera/Sensor that can be used for multiple usecases. Onedrone is also capable of avoiding obstacles around it and flying in confined areas without GPS.

Target Market

Videography, Insights (Mapping), Surveys

Team Members

3 Co-Founders, 4 Engineer

Product/Services

Qoptars is building a payload swappable drone in which you can swap sensors for different applications with onboard AI.

Key Highlights

Revenue till now : 68 Lakhs, Grants received : 48 Lakhs

Program

About the Business

My Udaan is a Technology Driven startup solving special people mobility problems.

Founders

Ravindra Singh | Co-founder | CEO
Anil Pereira | Co-founder | COO | IIT B

Team Members

2 Co-founders | 3 Support Staff

Problem Statement

Limited Mobility is the single largest problem | 30 million Disabled | 140 million elderly face Mobility Challenges | 8 out of 10 experience limitations in Mobility.

Product/Services

My Udaan introduced a unique product "V Go" which converts any manual wheelchair to a motorized wheelchair.

Value Proposition

People from the PwD & Elderly community will be able to attach/detach this product without outside help & experience independent mobility.

Key Highlights

ADAPTABILITY - Universal, fits any wheelchair | AFFORDABILITY - "V go" most affordable, value for money product | CONVENIENCE - Attachment does not need any outside assistance | COMPETITIVE - First in atmanirbhar campaign, Make in India

Target Market

Wheelchair Users

Umla Technologies Pvt. Ltd.

Establishment Date: July 2023

Brand Name: Umla

Type of Business: Service-based, Platform-based

About the Business

Umla is transforming social networking by integrating online interactions with real-world experiences. The platform enables users to purchase and share experiences such as coffee or movie tickets, connecting them with similar individuals. Meet face-to-face at partner locations, transforming digital connections into authentic relationships.

Founders

Harshika Sharma | Co-founder | CEO

Kuldeep Ahir | Co-founder | CBO

Team Members

2 Co-founders | 1 COO | 1 CTO | 3 Developers | 1 Ui/UX Designer

Problem Statement

There are limited platforms available for connecting with individuals who share similar interests and exchanging experiences.

Value Proposition

Umla gives you a special social networking experience. You can buy and share real-life experiences like going for coffee or watching movies, helping you make real friends in person. Unlike other platforms that are only online, Umla connects the digital and real worlds, making friendships that really matter.

Target Market

Young professionals, aged 22-40 from metro cities.

Product/Services

A unique social networking service focused on facilitating real-world connections through shared experiences.

Key Highlights

Generated revenue of Rs 1,20,000 in alpha testing.

Adiabatic

Establishment Date: September 2019

Brand Name: Adiabatic

Type of Business: Product-based

About the Business

Innovative minds within the company are envisioning a fresh approach to tackle the predominant issue of heat adversely affecting battery health and performance. Their vision entails the utilization of pioneering phase-changing materials to develop a highly efficient and cost-effective heat management solution. This innovative approach promises to markedly enhance battery health while circumventing the inefficiencies and high costs associated with current thermal management systems.

FRP Kavach

Establishment Date: January 2022

Brand Name: FRP Kavach

Type of Business: Product-based

About the Business

It is observed that a significant number of existing buildings and bridges are in urgent need of repair or structural reinforcement for various reasons. In India alone, there are over 20,000 bridges that have reached the end of their operational life. A proposed solution known as the FRP Kavach system has emerged as an exceptionally effective method for strengthening these aging structures. This system holds promise for revitalizing and reinforcing existing bridges and buildings, offering a viable solution to address their structural deficiencies.
